## QUOTATION

Your PAS 2030 quote will be based on the number of energy efficient measures you wish to apply for. The onsite assessment time for each measure has been calculated and allocated a number of units based on the time required to complete. The total number of units and cost of these is illustrated below.

Please tick the measures you wish to apply for in each relevant type (A, B, C, D) then calculate the total cost.

Heating and Plumbing measures (Type A)		
Measures	Tick Below	Units
Hot Water Systems	<input type="checkbox"/>	= 2
Condensing Boiler (LPG and Gas)	<input type="checkbox"/>	= 2
Condensing Boiler (Oil)	<input type="checkbox"/>	= 2

\*ELECSEA registered electrical contractors are not required to have an additional onsite assessment for the measures covered in Type B and are therefore exempt from the cost of this. Application fee and PAS 2030 Audit fee still apply. Additional measures will be charged at the usual rate.

\*\*MCS Installers are not required to have an additional onsite assessment for the measures they are already certified to install from Type D and are therefore exempt from the cost of this. Application and Audit fees still apply. Additional measures will be charged at the usual rate.

## SURVEILLANCE TIERS AND RATES

Surveillance of registered installers is calculated based on the requirements of PAS 2031, each measure is allocated a Tier (see below) which stipulates a % that dictates the volume of at-location site assessments required using the volume of work undertaken.

### TIER % RATES Assessment Rates

Measure Tier	Standard Assessment Rate	Reduced Assessment Rate
Tier 1	1%	1%
Tier 2	5%	3%
Tier 3	7%	4%
